

## TERMES OF REFERENCE

<b>Session Title</b>	Alternative Sources of Domestic Funding for CIPs	<b>Session Room</b>	<b>Ballroom 2</b>
<b>Session Length</b>	1h45Mins		
<b>Background</b>	<p>Even though family planning continues to be a high priority for donors and contributions from founding OP donors remained consistent reaching a record \$126 million in 2016, the current global context in terms of funding for FP programs and its unfavorable effect throughout the world and in Francophone West Africa, some of which are not even fully known yet, is cause for concern. It is therefore more than ever essential for OP countries to challenge rationale and thinking around and in favor of increased and sustainable funding of their CIPs. This resolve is reflected in the renewed commitments the 9 OP countries made at the London Summit in July 2017: (1) the 9 countries are striving to secure and increase by at least 10% a year, the contributory part of their governments in the budget allocated to the purchase of contraceptive products; (2) countries are also moving towards an inclusive approach to resource mobilization involving decentralized territorial communities to ensure accountability for the health financing of their populations</p> <p>Selected speakers, including central government, local government, parliamentarians and donor representatives, will explore and discuss alternative and innovative sources of funding that are currently in place in OP countries and have made provision for funding the current gaps needed for CIPs effective implementation. Speakers will include:</p> <ul style="list-style-type: none"> <li>• A mayor to discuss mobilizing alternative funding sources</li> <li>• A representative of the Ministry of Health in Niger to address CIP funding gaps and local resource mobilization</li> <li>• A parliamentarian to discuss efforts made in country to challenge the government in order to increase domestic resources for FP funding</li> <li>• A representative of GFF addressing how such projects intends fill in the funding gaps</li> </ul> <p>During the Q&amp;A, a representative from Guinea will discuss GFF and country resources towards FP Funding</p>		
<b>Expected Results</b>	<ol style="list-style-type: none"> <li>1. Country delegations better understand some funding sources and how they can address their CIPs funding gaps</li> <li>2. Donors can gather better information on local opportunities for funding and how they might support</li> <li>3. Audience is able to identify areas of collaboration and how these 4 interventions can foster more and innovative local funding solutions</li> </ol>		
<b>Equipment and</b>	Projector, a dias, and on-stage seats for panelists during discussion
